CSS). In a planned economy it is impossible for the various industries to manufacture the goods they want according to their own specifications.

The State Standardization Commission is responsible for planning the products to be manufactured, as well as their quality. For this purpose a set of specifications, called STAS, was fixed, which every

State Supply Commission (Comisiumes de Stat a Aprovizionarii - CSA). Every ministry has a Directorate, which deals with the supply of the factories under its supervision, and which is called the General Directorate for Supply and Distribution (DGAR). In view of the importance of the tasks, which the economic sectors have to fulfill, the CSA has lately been set up. From the time of its inception, the supplies of all ministries have been carried out by the CSA through the respective General Directorate. The general organization of
